

Quick installation guide

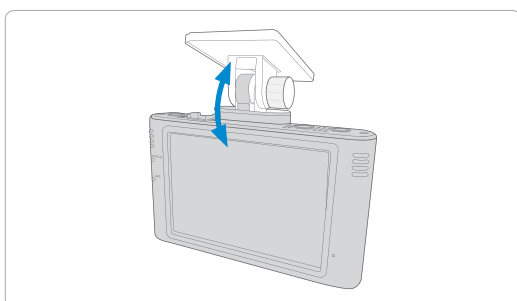

Main unit/front camera installation

- ① Align the cradle with the connector on the main unit and push it in until you hear a "click" sound.
- ② Be careful not to get fingerprints on the lens, and remove the lens protective film.

- ① Remove the double-sided tape on the cradle.
- ② Attach at the designated position.

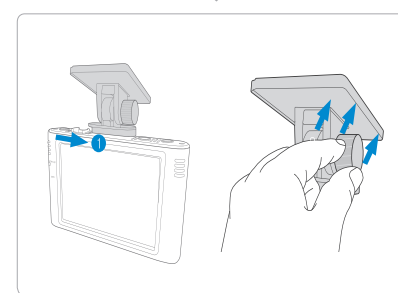

After adjusting angle of the unit up and down, turn the tighten with screw lightly to fix it.

※ Do not fully tighten the cradle screws. After connecting the cable, check the camera lens angle and readjust it as necessary.

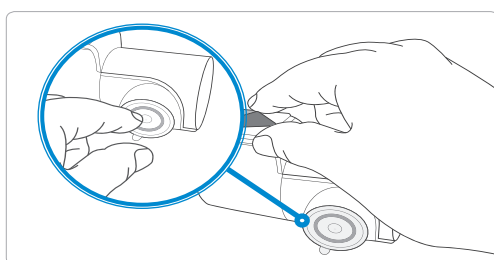

Align the product on the cradle, slide and press it completely until it clicks to lock

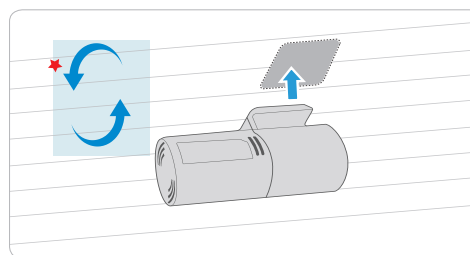

- ① After removing unit from the cradle, Please apply firm force to adhesive area.

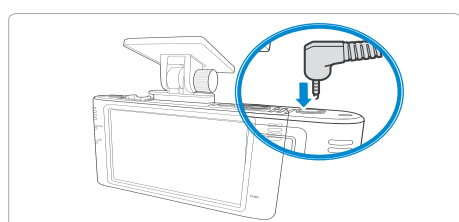

Rear camera installation

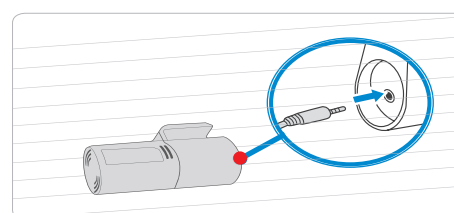

Remove the cradle adhesive and the protective film from the camera lens.

After attaching main unit's adhesive holder to the rear glass surface, apply sufficient force and fix it firmly.
※ Adjust the vertical camera angle properly.

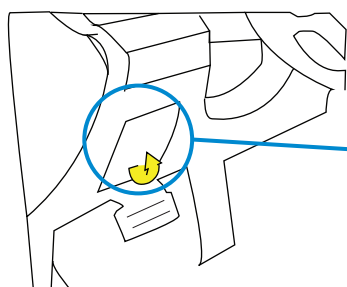

Connect one connector of the rear camera cable to the front camera CAM1 / CAM2 terminal located at the top of the unit.

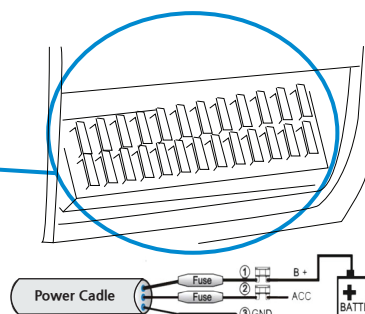

Connect the other end of the rear camera cable to the rear camera input terminal.

Connecting power cable

The fuse box is usually located under the dashboard of driver's seat.

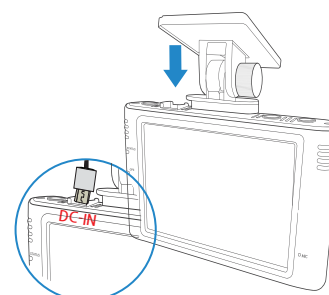

※ Fuse box location may vary by vehicle type. Please refer to the owner's manual supplied with the vehicle.

Open the fuse box and use the tester to locate one B+, ACC terminal and remove each fuse.

- ※ ① B+ fuse : Consistent Power source
- ② ACC fuse : Accessory power source
- ③ GND : Connect to the (-) terminal.

- Be sure to check the B +, ACC and GND label on the cable

Connect the B+ power cable to the DC-IN input terminal of the main unit.

Start the car to check if the main unit operates properly
